

Warum nicht? Studie zum internationalen Jugendaustausch: Zugänge und Barrieren » **Zugangsstudie**

„Access and obstacles in International Youth Work (Access-Study/Zugangsstudie)“ - an empirical study to be coordinated by Research-Practice-Dialogue: International Youth work c/o transfer e.V.

"Zugangsstudie" will analyse ways of accessing international youth work and the obstacles young people face when it comes to participation. There will be a specific focus on young people who are not participating. The objective of the research is to reduce barriers and restraints to participation, and enable young people to gain experiences in international contexts. The research will take place over three years (2016 - 2018) and will have a multidimensional and multi-methodic design. Four teams will conduct different lines of research to find out about the structural conditions and the individual motivation of young people towards their participation. The study is funded in Germany by the Federal Ministry of Family, Seniors, Women and Youth and the Robert Bosch Stiftung.
